

Running Lab7 with Emojis on Windows

You can follow these steps if you encounter any problems with emoji display.

1. Navigate to your working directory.
2. Open your terminal on Visual Studio Code.
3. Run the following command before running your lab project:

```
chcp 65001
```

After running the above command, you should see the following message on your terminal: "Active code page: 65001"

4. Run your lab on terminal:

```
java TowerDefenseGame.java
```

5. If above command doesn't work try compiling your program with UTF-8 encoding by pasting these commands to terminal:

javac -encoding UTF-8 TowerDefenseGame.java
java TowerDefenseGame

6. If you do not want to use emojis, you can use the following Unicode escapes instead:

🔥	"\uD83C\uDFF0"
👾	"\uD83D\uDC7E"
▢	"\u2B1C"
💣	"\uD83D\uDCA3"
💎	"\uD83D\uDC8E"
🌐	"\uD83C\uDF00"
